## CAREER OBJECTIVES

Computer Science graduate from York University working in IT with hands-on experience in enterprise service desk environments, focused on endpoint support, IT onboarding/offboarding, and user account administration. Experienced in supporting Windows and macOS environments, working with Active Directory, and handling high-volume ticket queues in fast-paced IT teams.

## WORK EXPERIENCE

### Junior IT Analyst – Deloitte

Mar 2026 – Present

- Set up, configure, and deploy 100+ Windows and macOS laptops for new hires, supporting smooth onboarding.
- Troubleshoot hardware, software, and network issues, providing timely end-user support.
- Handle ServiceNow tickets for onboarding and laptop rollouts, including user updates, asset tracking, and device setup.
- Support onboarding and offboarding processes, including device setup, data backup, imaging, and secure decommissioning.
- Assist with laptop rollout activities and asset coordination.
- Handle new hire and departure tickets, ensuring compliance with IT and security policies.
- Perform meeting room checks to ensure AV equipment (touch panels, displays, microphones, cameras) is working properly.
- Use Active Directory, Azure, Intune, JAMF, Absolute, and Secret Server for user management and device provisioning.
- Leverage Microsoft Copilot and internal GenAI tools to support troubleshooting, documentation, and IT support workflows.
- Provide technical support through ServiceNow, resolving hardware, software, and access-related issues for end users.
- Provide front-of-house IT support, assisting users with technical issues and resolving problems promptly to minimize disruptions.

### Workstation Support Assistant – Library Information Systems, York University

Jan 2026 – Feb 2026

- Provided technical support for library workstations and software.
- Performed basic hardware and software troubleshooting using a ticketing system.
- Assisted with system setup, software updates, and ongoing maintenance.

### Design Executive – Ellehacks (Volunteer)

June 2025 – Mar 2026

- Designed website content, event branding, and the official ElleHacks logo.
- Produced visual assets and layouts for the event dashboard, sponsorship packages, and promotional posters.
- Supported event operations by volunteering on-site and assisting participants.
- Collaborated with co-chairs and cross-functional teams to maintain a consistent user experience and cohesive branding.

### Service Desk Analyst - Liberty Utilities Canada Corp. (Co-op)

Sep 2023 – Jan 2024 | May 2024 – Aug 2024

- Resolved 100+ ServiceHub tickets daily, optimizing response time and reducing backlog.
- Diagnosed and fixed network share, security group (Citrix, Kubra), and mailbox access issues, ensuring seamless user access.
- Configured Active Directory, Microsoft Exchange, and Azure permissions, enhancing security compliance.
- Collaborated with the IT infrastructure team through cross-functional discussions, resolving complex challenges.
- Designed and launched an internal SharePoint website using HTML/CSS, improving document management.
- Automated group management and user assignments in Microsoft Exchange Azure via PowerShell scripts, reducing workload.
- Created user access documentation, streamlining onboarding and reducing troubleshooting time.

## PROJECTS

### E-commerce Website | React.js, Spring Boot, MySQL:

Sep 2024 – Dec 2024

- Built an e-commerce website for a clothing store using React for the frontend, Spring Boot for the backend, MySQL for data storage, and RESTful APIs for seamless communication.

### Egg-Timer | HTML, CSS, JavaScript, Electron.js, Node.js, Figma, Procreate:

Feb 2025

- Built an Egg Timer app using Procreate for sketching assets, Figma for designing frames, and HTML, CSS, and JavaScript for development. Integrated Electron.js and Node.js to make it a desktop application.

### WeatherApp | React Native, Expo, OpenWeatherMap API, Open-Meteo API:

April 2025

- Built a mobile weather application with city search, current location detection, and hourly forecasts. Integrated two weather APIs and designed a clean, user-friendly UI using React Native and Expo.

## TECHNICAL SKILLS

**Programming Languages:** SQL, Java, C, C#, HTML, CSS and Java Script, Python, RISC-V, UNIX, Verilog, Shell Scripting, React.

**IT Infrastructure:** Active Directory, Azure AD, Intune, JAMF, Office 365, Citrix, SharePoint, Microsoft Exchange.

**Frameworks/Designing tools:** Unity, Eclipse, Atom, Android Studio, MySQL workbench, Linux, Tabletop Simulator, Canva, Figma

**Other:** Microsoft Office 365 (Excel, Word, PowerPoint, Pivot Tables, VLOOKUP, Outlook, SharePoint, Teams), Customer Support.

## EDUCATION

**York University | Lassonde School of Engineering**

Jan 2018 - Dec 2024

Bachelor of Science (BSc) Computer Science Honours Major
